Tips and tricks for achieving venue styling perfection, whatever your theme

by Natalie Rea from The Hanging Lantern Company Ltd

*“Every year Aimee and I like to go to London Fashion Week to look at the trends and see how we can reflect them in wedding styling.”*

*“This year a key theme that stood out was metallic and antique gold.”*

*“The metallic round lanterns create a particularly bold statement that’s fun and energetic, but with a modern vibe.”*

*“The antique gold is a softer, more elegant tone that brings a luxurious quality to wedding lantern displays.”*

by Kelly Kearley from Not Your Average I do

*“We’re using a lot of lush, rich green leaves and moss to create beautiful table displays, stunning centrepieces and natural archways to bring the outdoors in.”*

*“We love that foliage adds an extra dimension. It adds interest to any space.”*

*“We encourage brides to use foliage in their bouquet as well as their décor so one complements the other and the day flows effortlessly.”*

*“Moss table runners are proving popular this year and are a great alternative to traditional runners. Pair them with foliage hung between lanterns for a fun look.”*

*“This is a more cost-effective option compared to fresh flowers, but it still creates a perfect, natural backdrop.”*
